## MEMORANDUM

TO: S. Hayes (EPA WAM & SAM)

cc: J. Farley (ME RCRA), D. Hanley (ME DEP), E. Waterman (U.S. EPA)

FROM: L. Pavlos, Task Manager                      DATE:3/20/92  
THRU: J. Mastone, Site Manager

PROJECT: Region I ARCS                                      W.O. NO.: 4100-11-50-0004

SUBJECT: Trip Report -- On-site Reconnaissance  
Jet Line Services, Inc.  
South Portland, Maine  
CERCLIS No. MED019051069  
TDD NO. 9108-111-AWE  
Work Assignment No. 11-1JZZ

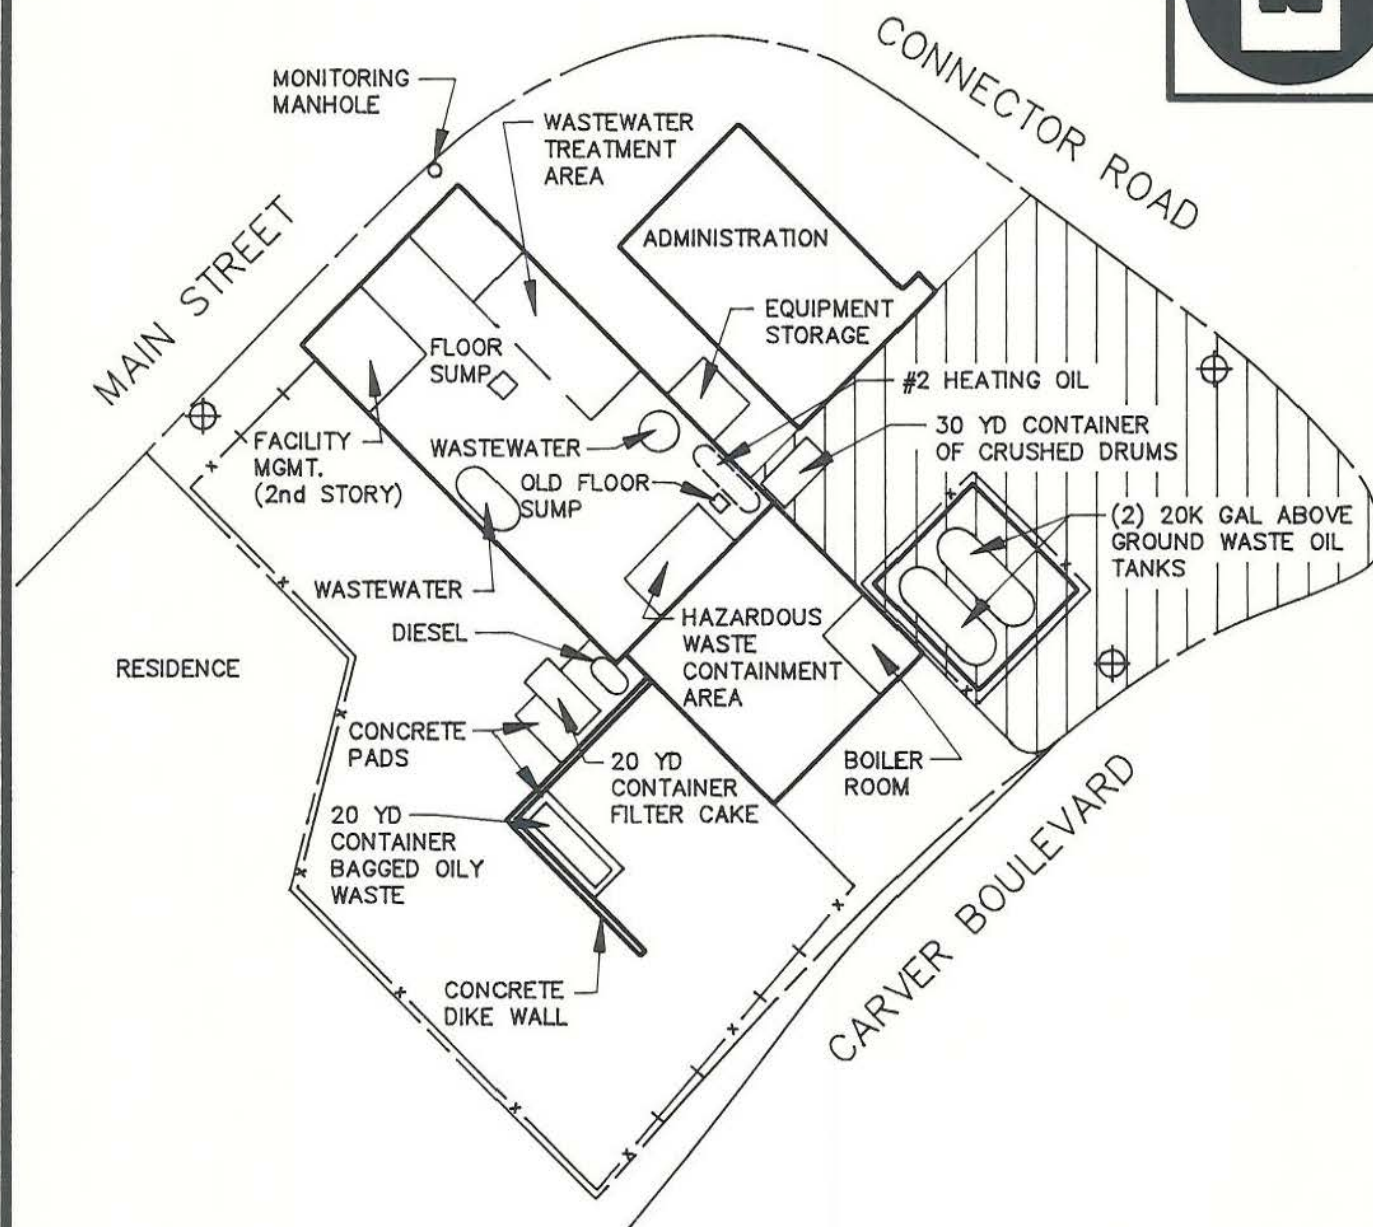

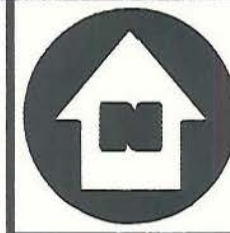

On Monday, March 16, 1992, Region I ARCS personnel conducted an on-site reconnaissance of the Jet Line Services, Inc. (Jet Line) property, located at 106 Main Street, South Portland Maine. The property is currently occupied by Jet Line, a hazardous waste storer and transporter. Jet Line is also a hazardous waste spill clean-up contractor. Region I ARCS personnel present during the on-site reconnaissance were Ms. Audrey Carter and Ms. Laurie Pavlos. The Region I ARCS field team was met on-site by Mr. David B. Grant. Mr. Grant is the facility manager of Jet Line.

During the field activities, Solid Waste Management Units (SWMUs) were identified in order to determine Areas of Concern (AOCs) and to assess the likelihood of release of hazardous materials from the site. Eight potential AOCs were identified during the on-site reconnaissance including: 1) aboveground tank storage facility for waste oil consisting of two 20,000 gallon tanks; 2) container storage area for drum storage of combustible, flammable and oily wastes; 3) one 20,000 gallon No. 2 heating oil underground storage tank (UST); 4) one above ground 500 gallon diesel fuel tank; 5) one 200 gallon floor sump (in use) and one former 150 gallon floor sump (filled in); 6) two above ground waste water storage tanks; 7) indoor drummed waste water storage area; and 8) containers of filter cake, bagged oil sludge, and crushed drums. Each of these AOCs are identified on the attached draft site sketch. Stained soil was observed within the walls of the aboveground waste oil tank storage facility. No vegetation was present on-site.

On-site reconnaissance field activities were conducted in accordance with the reviewed and approved Task Work Plan and site-specific Health and Safety Plan.

MEMORANDUM

DATE: October 1, 1993

SUBJ: Finding of no Analogous State or Voluntary Corrective  
Action Events at this time at MED019051069  
Environmental Compliance Corp

FROM: Cathy Lei

TO: Matt Hoagland, Chief  
ME, NH & VT Waste Regulation Section

Using the Region I "Definitions and Analogous Criteria  
for Corrective Action Events" guidance dated May 27,  
1993, I do not think that the State of Maine has  
completed any of the following State or Voluntary  
Corrective Action Events:

CA100 RFI Imposition  
CA150 RFI Workplan Approved  
CA200 RFI Approved  
CA300 CMS Workplan Approved  
CA400 Remedy Selected  
CA500 CMI Workplan Approved  
CA600 Stabilization Measure Initiated  
CA650 Stabilization Construction Complete

This is based upon three conversations I had with Mr.  
Peter Blanchard from the State of Maine Department of  
Environmental Protection about whether the State of  
Maine completed any Corrective Action Events using the  
Region I "Definitions and Analogous Criteria for  
Corrective Action Events" guidance dated May 27, 1993.
